## DETAILED ACTION

### ***Requirement for Election of Species***

1. This application contains claims directed to the following patentably distinct species:

group I – invention of Fig's 1-7 for example.

group II – invention of Fig's 8-14 for example.

group III – invention of Fig 17 for example.

The species are independent or distinct because the fundamental function and structure of each invention is patentably distinct one from the other whereby search and consideration of diverging issues raised during the examination of all three inventions in this one Application would place undue burden on the examiner especially where as now, the search for each invention is not necessarily required for each other and vice versa..

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3676

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
